

## COVID VENUES LIMITED – “Track and Trace made simple”

Covid Venues Limited are a NI based software company that provide digital track and trace capabilities for your hotel or venue. We have over 200 customers in Northern Ireland from a standing start in July 2020 and over 75,000 registrations in that period.

Registration for customers is simple, requires no login and takes 15-20 seconds. The venue owner then has a detailed list of all visitors that we at Covid Venues can provide to Track and Trace personnel if required.

Our solution does **not** require downloading of an app and works on any phone that can access the internet.

Hotels are provided with QR codes that link directly to their specific site (branded with your hotel logo) to make registering even easier and “on-brand” for your customers. This can be used at your venue to cover multiple areas within your hotel such as bars, restaurants or conference facilities.

Data is stored in an encrypted database and fully complies with both UK and EU GDPR regulations. You can see our privacy policy at <https://nihf.oqlist.co.uk/privacy-policy>.

The cost is £135 or £150 for 12 months service including initial setup. This represents a 15% discount off our normal price for NIHF members.

To see more information about how the system works see <https://nihf.oqlist.co.uk/website>.
