

At Table Ordering App

Is your Cafe, Bar, Restaurant or Hotel ready for post lockdown business?

Tapa At Table Ordering App is perfect to continue business and observe social distancing rules & laws, and it's convenient too! Designed with a simple & clear layout to give guests the easiest experience to place & pay for food and drink orders.

Your customers can place their own orders and pay at the table, staff then simply prepare & deliver the orders to customers tables! Cut down the number of staff required, decrease labour costs and offer guests and employees complete peace of mind.

Orders link seamlessly with Tapa POS and print to kitchen and bar printers or even kitchen screens. Tapa is a fully functional point-of-sale system designed for hospitality with all the features you'd expect including Stock Control and interfaces with ResDiary table reservations and property management software.

Changes can be easily made to fit the software with your business & brand. With one simple monthly payment there's no commissions and all you need is a Stripe account.

To find out more Call Us 71 860069 or Email sales@rstepos.com

- Customers can remain at their table to order and pay for food and drink, avoiding bar serving areas where human contact and spacing is reduced.
- Just place your contactless menu QR code on tables for customers to scan and open your menu on any smart phone or tablet. Alternatively QR codes can go on printed menus and customers can only order when presented with the menu
- Customers can easily navigate your menu, select what they want to order, customise options and pay by credit card without any complications.
- Guests are guided through the entire order process... how do they want their steak cooked, which sauce would they like, which side order, fully functional and intuitive.
- Increase revenue with smart upsell features like pop-up menus... would you like any extra sauces, would you like to order the wine we recommend with this main course, increase your average spend.
- Our At Table app is fully integrated with Tapa POS. This means when a customer uses the app their order goes straight to the till, orders are printed to the kitchen or bar without needing any server interaction. Database setup is all on the one system and stock levels can be updated and transactions recorded on the EPOS system.
